

ABSTRACT OF THE DISCLOSURE

2

3 A carrying case providing privacy and light shade for a
4 screen of a laptop computer disposed therein. The carrying case
5 includes top and bottom portions movable between closed and open
6 positions, and panels disposed on the interior surface of the
7 case top portion and pivotally movable from flush with the top
8 portion interior surface to form an inverted u-shaped shroud
9 resting on the interior surface of the case bottom portion. The
10 case top and bottom portions, and panels form a five sided
11 cavity, a sixth side being open to permit viewing of the screen
12 of the computer by an operator.
